Tickers Removed, Four Baltimore **Brokers Suspend**

Stock Exchange Here Says Action Was Taken to Put Trading Conditions a Sounder Basis

BALTIMORE, Aug. 9.—Four Baltimore brokerage firms were forced to suspend business temporarily to-day when their stock tickers were disconnected by orders from the New York Stock Exchange. The firms, none of which is a member of the New York Stock Exchange, sold stocks on the partial payment plan, but, it is alleged, contrary to the rules of the exchange.

The firms affected were Smith, Lockhart & Co., Kaderly & Finnan, Mueller, Stout & Co. and W. H. Stout & Co.

The action came without warning to the firms. They made an effort to get quotations from New York over private wires, but within a few minutes after the opening of the market found themselves unable to do business in this manner and were forced to suspend.

Smith, Lockhart & Co. later filed a petition in bankruptcy admitting insolvency. No schedule of assets or liabilities was filed, but the actual claims in the petition were \$27,000 and it was set forth that there were many more creditors.

Kaderly & Finnan executed a deed of trust for the benefit of creditors in the Superior Court this afternoon. H. A. Orrick was appointed receiver and bonded for \$100,000.

Action of the New York Stock Exchange in removing the tickers from four Baltimore houses yesterday was stated to be merely another step in carrying out the nation-wide effort of that organization to put trading conditions on a sounder basis. Similar action, it was recalled was recently

Reports filed by the carriers with the car service division of the American Railway Association give the record of loading of freight during the week ended July 29 as 859,733 cars, a decrease of 1,391 cars as compared with the previous week, but an increase of 64,301 cars over the accrease for the corresponding week of last year. The influence of the coal strike is still parameunt in limiting the total freight movement, loadings of this commodity covering 76,374 cars. Freight cars idle on July 23 numbered 387,322, compared with 417,029 cars on July 15. Of the total, 203,322 cars were in good repair and in excess of the normal number unfit for service.
